

tesa scribos® – combining technologies for individual solutions

Combining technologies for individual solutions

The starting point of our work is always the individual risk scenario of the product. For complex protection requirements, a combination of our security technologies may represent the best solution for you.

tesa Holospot® 1/5 with barcode and/or serial number

tesa Holospot® 1/5 with barcode and/or serial number

Thermo transfer printed bar codes, matrix codes and human readable codes on tesa Holospot® labels are used for track & trace and online customer interaction. The serial number that is stored within the forgery proof tesa Holospot® is also represented as a matrix code symbol for automated reading with standard industrial readers. Codes can either be serialised or encrypted.

For consumer interaction via internet or mobile phone, the human readable code is used.

tesa scribos® Brand Protection Set

tesa Holospot® on Card – Customised brand protection for luxury goods

Each individual, item-unique tesa Holospot® Brand Protection Set comes with a custom-made warranty card. Besides the firmly affixed Holospot®, the card also features two other suitably coded Holospot® labels. When used, these labels are directly attached to the luxury product and to the packaging. The Holospot® for the packaging can also be given a track & trace-capable barcode to provide grey market protection. Additional, exclusive customer loyalty is offered by optional online registration and verification by the end customer.

tesa Holospot® on Label

tesa Holospot® on Label – maximum protection, minimal effort

tesa Holospots® readily applied to pre-printed or blank product labels is a smart method to introduce this technology without any changes in the production process. This offers high flexibility in design and information content combined with the forgery proof tesa Holospot® for counterfeit protection.

tesa Holospot® label

tesa Holospot® printed – protection by your brand logo

Design elements, such as logos and trade marks, can be printed on top of a tesa Holospot® label. Your trademark rights in combination with the tesa Holospot® technology maximise the protective performance.
